NEW YORK, NEW YORK NOVEMBER 30 - DECEMBER 2, 2017

COURSE CHAIRMEN

SHERRELL J. ASTON, MD DANIEL C. BAKER, MD

JOINTLY PROVIDED BY

ENDORSED BY

COURSE DESCRIPTION

The Aston Baker Cutting Edge 2017 Aesthetic Surgery Symposium is a uniquely designed and innovative educational experience covering the most advanced techniques for total body rejuvenation and sculpting.

The program features 94 instructive surgical videos, 26 power point presentations, 13 panels, and 8 Point / Counter Point Debates. Attendees will see the hands-on work of our world-renowned faculty of international experts. The videos will be highly edited to highlight the key steps of advanced techniques for face and body rejuvenation and contouring. Thirteen panels will explore methods for facial and body rejuvenation and sculpting, comparing the complexity of procedures, technical details, longevity, complications and patient safety issues. Eight Point / Counter Point sessions will encourage debate between faculty members on philosophy, techniques, and controversial areas.

An Open Forum with the Faculty will permit audience participation, questions and discussion. A unique, first of its kind, opportunity will be given to registrants to demonstrate their questions to the faculty and audience. Patient safety, complications and long term results will be stressed throughout the symposium.

THE VIDEOS WILL DEMONSTRATE:

- The comparison of fat and fillers for facial contouring and rejuvenation
- Surgical and non-surgical forehead and brow rejuvenation
- Upper and lower lid blepharoplasty, including management of lateral canthus
- Variations in facelift techniques and anatomical considerations
- Neck corrections and contouring techniques
- Choices and results in non-surgical face and neck rejuvenation, injection techniques, and treatment of complications
- Procedures for breast augmentation, mastopexy, breast reduction, gynecomastia and correction of breast deformities
- Surgical sculpting of the abdomen, arms, back, thighs, and buttocks, including the most advanced techniques for liposuction and fat grafting
- Surgical and non-surgical rejuvenation of the female genitalia

LEARNING OBJECTIVES

- Differentiate various techniques for forehead, supraorbital and periorbital rejuvenation and when to apply them.
- Recognize the technical details for various facelift and neck lift procedures.
- Discuss the technical details for breast augmentation, breast reduction, and breast correction procedures.
- Define surgical techniques for total body rejuvenation and sculpting, including female genitalia.
- Discuss and evaluate the advantages, disadvantages, and complications of current techniques for non-invasive and minimally invasive procedures for total body sculpting.
- Understand the benefits and complications of autologous fat injections, and the most often used facial fillers and neuromodulators.
- Prevent complications related to facial rejuvenation and total body sculpting.

This program has been reviewed by the Educational Council and is officially Endorsed by the International Society of Aesthetic Plastic Surgery (ISAPS). Endorsement is not approval for Continuing Medical Education (CME) credit. The organizers may at their discretion provide separate CME credit.

GENERAL INFORMATION

ACCREDITATION / DESIGNATION

This activity has been planned and implemented in accordance with the Essential Areas and Elements of the Accreditation Council for Continuing Medical Education through the joint providership of the American Society for Aesthetic Plastic Surgery, Inc. and the New York Plastic Surgery Foundation, Inc. The American Society for Aesthetic Plastic Surgery, Inc. is accredited by the ACCME to provide continuing medical education for physicians.

The American Society for Aesthetic Plastic Surgery, Inc. designates this educational activity for a maximum of **22.5 AMA PRA Category 1 Credits™**. Physicians should claim credit commensurate with the extent of their participation in the activity. Credit hours are subject to program changes.

Of the 22.25 credits, 3.5 have been identified as programming dedicated to patient safety related topics and will satisfy the Patient Safety CME requirement.

DISCLOSURE POLICY

The American Society for Aesthetic Plastic Surgery requires all instructors, planners, and other individuals in a position to control or influence the content of an activity, to disclose all relevant financial relationships or affiliations within the past 12 months. All identified conflicts of interest must be resolved and the educational content thoroughly vetted by ASAPS for fair balance, scientific objectivity, and appropriateness of patient care recommendations. ASAPS also requires faculty/authors to disclose when off-label/unapproved uses of a product are discussed in a CME activity or included in related materials. Attendees providing comments or asking questions during presentations are also required to disclose all related commercial interests. For purposes of this policy, the relevant financial relationships of one's partner must also be disclosed.

SYMPOSIUM REGISTRATION

Enrollment is limited to board certified or board eligible Plastic Surgeons and Facial Plastic Surgeons. Residents and Fellows from accredited programs may enroll with a status verification letter from the Chairman of their department. Accompanying physician assistants, nurses, office personnel, and spouses may also register. Advanced registration is strongly suggested. Please note that our previous symposia have sold out four weeks prior to the meeting. If there is any remaining space available for on-site registration, you must pay the on-site registration fee in cash only. Registration forms will be accepted on a space available basis, according to the date received.
